Are demanding the "Gillespie Malt" brand poultry and Dairy Feeds. Why? Because they are scientifically blended, machine mixed, contain the highest quality ingredients and produce the desired results. See our nearest elevator agent

**GILLESPIE GRAIN CO. LTD.**

**Grain Company Operated at a Loss.**

Operations of the Alberta Pacific Grain Co. Ltd., for the year ended June 30th last, resulted in a loss of \$12,414.52 compared with a profit of \$4,491.13 the previous year, according to the financial statements made public by H. E. Sellers, President of the company. Bond interest of \$164,283.67 was met and \$351,332.93 added to depreciation reserves.

In view of the uncertainty of the outlook for the coming year on account of the poor harvest in western Canada, necessity of considering further extension of suspension of sinking fund operations in connection with the Company's \$3,500,000 first mortgage bond issue will be considered by the Directors during the current year, the report indicates.

The report of the Directors to Shareholders states, in part:

"Further improvement of \$284,253.47 in working capital position was effected during the year. The arrangement made with the First Mortgage Bondholders in 1934 for the suspension of Sinking Fund payments for a period of 3 years expired June 1 last. The result of operations during the current year will be the deciding factor on whether application for an extension of suspension of Sinking Fund payments will be made to the Bondholders.

"Company's properties have been maintained in good repair. Taxation continues to be a heavy burden in the operations of the Company. During the year under review an amount of \$92,070.89 was contributed to Dominion, Provincial and Municipal governmental bodies in the form of direct taxes."

The Alberta Pacific is one of the large elevator companies operating in Canada. The company operates 371 country elevators located thruout Saskatchewan and Alberta, and terminal elevators at Vancouver.

Directors and officers of the Company are: H. E. Sellers, President; K. C. Allen, General Manager; Cecil Lamont, Secretary; C. J. Bingley, Treasurer; A. F. Culver, Montreal; C. W. Band, Toronto; H. W. Webster, Winnipeg; L. Killam, Vancouver; and R. W. Ward, Calgary, Directors.

The annual general meeting of shareholders will be held in Calgary, October 27.

**Let Your Lights Be Burning!**

Stony Plain motorists have again been reminded that the regulations of The Vehicles & Highway Traffic Act are still in force, and are being enforced by squads which patrol the Highway. Recently all east-bound traffic was stopped and cars and drivers given the once over. The condition of head lights and tail lights were given special attention. A few were found which were not up to the mark, and the drivers were given a "ticket." The recipient of a ticket is obliged to report to the nearest RCMP Detachment at a date later on, where it must be shown that the defect for which the ticket was given, had been remedied.

**Gone to the Orient.**

Wong York, Stony's Chinaman restaurateur, left on Saturday's west bound C.N.R. train for Vancouver, from where he will sail Sept 19th on a Canadian Pacific liner, for Hong Kong, China, for a visit with his family.

Wong's last visit there was in 1922, when he was away for a nine-month period.

During his absence the eating house here will be operated by Wong's nephew, Wong Charlie, who returned from a trip to China early in the year.

**Dance on Friday Evening.**

Tomorrow evening, Friday, the 18th, is the date of the annual dance of the Tennis Club, to be held in Kelly's Hall. This club's dance has always been the occasion for a large turnout of dancers—both local and visitors from the City.

**Wheat Giving a Good Yield.**

In confirmation of what has been previously stated concerning the remarkable (and surprising) large yields of grain on some farms in this district, we have threshers' returns to hand from some farms in Spruce Grove district, where one farm's yield of wheat ran as high as 35 bushels to the acre. At a Winterburn farm it is said to have averaged as high as 51 bushels to the acre; 40 bu. at Ellerslie; and 45 at Clover Bar.

What is also giving general satisfaction, along with the good yields reported, is the return from the early deliveries to the elevators, where the wheat has been grading No. 1 and 2 Northern and No. 1 Garret.

Among the large yields of coarse grains reported are oats down at Woodbush which averaged 75 bu. to the acre; and at Bretons the same yield of oats is reported.

Another pleasing feature is the fact that there has not done any damage this season, as was the case last year; so that instead of half the wheat crop grading No. 5 or "feed," high quality grain is the rule. Even where yields are light, farmers are reported as saying such fields will return as much or more money to them.

The first crop returns show that the estimate made by an expert on August 19th, that Northern and Central Alberta farmers will this year receive 11 million dollars more than for last year's wheat crop, will be more than realized.

### None Finer Made

## Equitability In Debt Adjustment

With governments, boards of adjudication and arbitration and organizations innumerable all imbued with different ideas on the subject, the process of defating the accumulated indebtedness of farmers in the prairie provinces, generally referred to as debt adjustment, is an exceedingly complicated problem.

It is not rendered any the less so because the problem is being dealt with by a multiplicity of tribunals with varying degrees of authority and some with none at all, and in view of the fact that the human element is a very important factor in straightening out the tangled affairs of the debtors on a reasonable basis and at the same time to the satisfaction of both parties to amended contracts.

The large number of debtors involved, the wide variations in the nature and terms of the agreements from which some easement is sought, the great spread in circumstances and conditions under which the debtors have been and still are operating, the wide range in the capacity and ability of the land to produce, as well as other factors, conspire to prevent the placing of debt adjustment on a mathematically scientific basis and for this reason, decisions of tribunals and new agreements made on a voluntary basis may not always appear on the face of them, to be equitable when compared with other decrees and other agreements.

Where voluntary adjustments are made by mutual consent of debtor and creditor, either directly or through the mediation of a board, the question of equitability is not an important consideration. So long as the two parties involved can reach a decision satisfactory to both, the terms are of no concern to any other person.

But where the terms of a new agreement are imposed on debtor and creditor by a tribunal armed with enforcement authority, the question assumes a different complexion. Under such circumstances, while as stated at the outset, agreements cannot be made to comply with any rigid mathematical formulas for the reasons set forth, every effort should be made to establish fundamental principles and policies which will ensure the nearest possible approximation to equitability.

Some, perhaps all of the boards operating in the three provinces have already enunciated principles trending in this direction to which they are prepared to adhere as closely as circumstances permit. They have announced that the chief objective of their decisions is to keep the farmer on the land and enable him to carry on. From this it follows that new contracts authorized must comprise terms within the capacity and ability of the farmer-debtor to comply. At the same time they must be fair and reasonable from the creditors' viewpoint, if for no other reason, for the sake of availability of future credit.

The Federal Board of Review in Saskatchewan, however, has gone even further than enunciating the general principles outlined above. In a recent announcement the board declared that after the total amount of real estate mortgage indebtedness to be repaid has been determined, new agreements will cover a ten year period, providing for repayment of principal sums in ascending scale, the agreement to bear a maximum interest rate of six per cent, with provision for suspension of payment in case of crop failure. Fairly specific policies, with reservation for variation under special circumstances, were also announced with respect to other forms of indebtedness.

Whether or not the precise terms outlined meet general approval, the effort to provide for some measure of uniformity of general debt adjustment provisions is a step in the right direction and should similar policies be adopted by the boards in the provinces of Alberta and Manitoba, as is indicated they are likely to do, a further step forward in the direction of equitability will have been made.

Recently the United Farmers of Canada suggested that some provision should be made for appeal from decisions of the Boards of Review but if the general principles and policies which have been promulgated, at least by the Board in Saskatchewan, are followed as closely as varying circumstances permit, it is reasonable to assume that requests for the right of appeal will presently dissolve.

If a generally satisfactory degree of equitability can be made effective in decrees of the respective boards and if debtor and creditor will approach negotiations under voluntary mediation in a spirit of reasonableness much of the difficulty of debt adjustment will automatically be dispensed and what is now a complicated problem will be materially simplified and costs of the undertaking much reduced.

### Rule Is Strict

Women with bound feet will not be eligible for marriage in Shanung provinces after January 1, 1937, the provincial government has ordered. Bachelors who persist in choosing wives with "lily feet" will face heavy punishment, estate the order.

## Iron the Easy Way

**Why Use Coleman Easy Way IRON**

**Price as Low as \$4.98**

See how easy it is to use. No need to heat. No need to iron. No need to wash. No need to dry. No need to hang. No need to fold. No need to iron. No need to wash. No need to dry. No need to hang. No need to fold.

**Why Use It?**

1. Should have it.
2. Cost only \$4.98.
3. Irons in a few minutes.
4. Quickly ready for use.
5. Machine is compact.
6. Neatest to the point of view.
7. Irons with less effort.
8. Saves 10 minutes.
9. No need to fold.
10. No need to hang.
11. No need to iron.

### Stresses Water Conservation

**Irrigation Necessary On Prairie**  
**Opinion Of John Vallance**

The necessity of water conservation as planned under the Prairie Farm Rehabilitation Act, not only for Saskatchewan but for the three western provinces was stressed by John Vallance, senior officer of the act, in an address to a joint meeting of the Rotary and Kiwanis clubs in the Hotel Saskatchewan, Regina, recently.

Irrigation must be developed in every possible area, the speaker declared, in order to supplement the whole feed supply in the entire drought stricken sections.

Present plans for water conservation, by the act, he said, called for the forming of large storage basins in areas where the spring run-off could be conserved. He said further and larger development of the project was necessary.

Assistance will be given individuals and groups of farmers by the P.F.R.A.

### War Bursaries

**I.O.D.E. War Memorial To Children Of Soldiers Killed Or Disabled**

The national executive council of the Imperial Order Daughters of the Empire announced 17 bursaries of a total value of \$20,400 had been awarded under the I.O.D.E. war memorial to children of soldiers killed or disabled in the war.

The national educational secretary reported the bursaries had been awarded in Saskatchewan as follows: Duncan G. Blair, Regina, son of Pte. Duncan Blair, died of wounds; Charlotte D. B. Hardie, Moose Jaw, whose father was killed in action; John Alexander McTavish, Kerrobert. (Particulars incomplete).

Special partial bursaries were provided for seven other students whose fathers had been killed in battle or permanently disabled. Four of these students live in British Columbia and three in Ontario, but their names were not announced.

## WAKE UP YOUR LIVER BILE—

**And You'll Jump Out of Bed in the Morning**

The liver should be out of bed in the morning. It is the liver that keeps the bile flowing into your bowels daily. If this bile is not flowing, it is the liver that is the cause of all the trouble. It is just as simple as that. The liver is the organ that keeps the bile flowing into your bowels. If this bile is not flowing, it is the liver that is the cause of all the trouble. It is just as simple as that.

A more powerful medicine doesn't always get the job done. It is the liver that keeps the bile flowing into your bowels. If this bile is not flowing, it is the liver that is the cause of all the trouble. It is just as simple as that. The liver is the organ that keeps the bile flowing into your bowels. If this bile is not flowing, it is the liver that is the cause of all the trouble. It is just as simple as that.

### Gang Warfare

**Gangsters Cause Trouble For Police In London And Glasgow**

In London and Glasgow alike war has been declared on gangsters. Two men lay in Balham hospital. They had been slashed by razors in a gang fight. Police circulated a message asking for news of the gang whose activities have been worrying authorities for some time past.

Glasgow magistrates have decided to "exercise their powers to the fullest extent" to stamp out the city's armed gangs. The chief constable and a special committee reported that gang warfare had spread to such an extent in the east end of Glasgow as to "create considerable anxiety in the minds of the public."

### SELECTED RECIPES

#### OATMEAL COOKIES

- 1 cup chopped raisins
- 1 cup butter or brown sugar
- 1/2 cup butter or lard
- 1 teaspoon salt
- 1 teaspoon cinnamon
- 1 teaspoon soda dissolved in one tablespoon hot water
- 2 cups Purdy oats
- 1 1/2 cups Purdy flour

Method: 1. Mix in order given and drop from spoon on to greased baking sheet. 2. Bake in slow oven of 300 degrees for 20 minutes.

#### An Underground Home

Plans for Britain's first bombproof and gasproof underground home, where the owner can sleep under ground without fear of air raids, has been announced by English architects. It is to be built at a cost of \$150,000 under a lonely Hertfordshire meadow and will be a luxurious mansion of twenty rooms.

Germany is trying to increase its wool supply to 30 per cent of the country's needs.

South Africa has started a work colony for "worn" works."

### Advertisers Saved

**Waged Battle Against Snow In Himalayan Mountains**

Five men, including Fasal Elshah of the Survey of India, were carried into Mussoorie, all suffering badly from exposure and frost bite, after being marooned for seven days near the famous Gangotri glacier, India, at a height of 18,000 feet.

The party, counting on the fine weather, had sent back their coolies ten miles to bring up rations and fuel. During their absence, the weather suddenly changed. The monsoon, which is exceptionally violent this year, penetrated the main Himalayan range and, for two nights in succession eight feet of snow fell on the survivors' camp.

The supply coolies failed to return. After two days the party had no more fuel left—they had burned even their tent pegs—and had run short of food.

They had no alternative but to try to cut their way out. For three days they battled against the snow, which was so soft that they sank in it up to their necks and could only make progress by crawling on their hands and knees and by tunnelling.

Then the rescue party arrived and they were helped and carried down the remaining three miles to camp and, after a few days' rest were subsequently taken in to Mussoorie for treatment. All of them were making good progress and should recover completely.

### Deserted Town

**Baron Tweedsmuir And Party Pay Visit To Bankhead**

A Rocky Mountain ghost town, Bankhead, above which towers the 10,000-foot peak of Cascade mountain, was visited recently by Canada's governor-general, Baron Tweedsmuir and Lady Tweedsmuir.

In the once prosperous town deserted a few years ago by its 2,000 inhabitants when work in a mine, its chief source of industry, was halted, stands a lone cenotaph, to commemorate the miners' war dead. There the governor-general stood in silent prayer after placing a wreath in tribute to the warriors. Only a few persons witnessed the ceremony.

Paying tribute to the part played by Canadian soldiers in the Great War, Baron Tweedsmuir warned that Canada must still fight for her place among the nations of the world.

To the Banff school children whom he visited, he said: "Think of your king not only as your king but also as your neighbor."

### Does Fine Embroidery

**Eighty-Seven-Year-Old Man Exhibits Exquisite Work**

One of the most enthusiastic needleworkers who visited the Women's Building at the Canadian National Exhibition in Toronto, was Thomas W. Willoughby, formerly of Burlington, and now of Newmarket, according to a report from the Women's Building.

He announced his age to be 87, and after showing a practically disabled right hand, opened a box of fine linen embroidered in silks with shaded colors.

"I do this to fill in my time; to cure loneliness," said Mr. Willoughby. "But I want you ladies to understand that I had never had a needle in my hands until a few years ago. Of course, as a boy, I used to hook rugs, but this is different."

Mr. Willoughby's exhibit received a special display in the building. He did not enter it for competition.

Society cannot exist without law and order, and cannot advance except through vigorous innovators.

The largest active volcano in the world is Kilauea, in Hawaii. Its crater is two miles in diameter.

For amateur gardeners a folding wheelbarrow that resembles an infant's carriage has been invented.

Nearly 240,000 gallons of gasoline have been made from coal in a plant at Billingham, Eng.

## Palliser's Triangle In Western Canada Section Of Comparatively Low Rainfall

By Canada's prairie population surveys conducted through one of the worst droughts in history, science strives to ameliorate for all future time conditions in a vast semi-arid area which some hold was never suited to support a permanent population.

In almost 28,000,000 acres of semi-arid country, known to agricultural technologists as "Palliser's triangle" and part of what was once called the "Great American Desert," some farmers have seen their crops wither for the eighth successive year and the soil of their land, baked by relentless sunshine, drift on hot winds like snow in a winter storm.

Year after year drought has plagued them almost into forgetfulness of former fruitful seasons that made life pleasant between recurring droughts that have beset the triangle for at least a century. Some say a pastoral people, herding cattle over the ranges that were there before the land was put to the plow, might have fared better, others that scientific husbanding of the soil still will save the country for its inhabitants.

The triangle, really an irregular pentagon, was placed on the map between 1857 and 1860 by Captain John Palliser, explorer working under instruction of the British Colonial Office. The land of the triangle extends along the international boundary from Turtle Mountain, about 60 miles east of the Manitoba-Saskatchewan boundary, to the foot of the Rockies. From the Rockies it extends north-northwest to Old Fort, about 50 miles west of Calgary, north-northeast to a point near Olds, Alta., due east to a point a little south of Saskatoon and from there southeast to Turtle Mountain.

Its climate is characterized by low rainfall, its natural vegetation by short prairie grass. Purchase from the Hudson's Bay Company of the whole territory now included in Manitoba, Saskatchewan and Alberta launched an experiment in 1870 of setting an agricultural population in an area of about 2,000,000 square miles, which formerly had supported a roving Indian population and the fur trade with a little subsidiary agriculture.

The census of 1880, last before purchase of the territory by Canada, showed that huge area supporting a population of 6,681 persons, other than Indians, and cultivated of less than 9,000 acres of land. The Indian population, living off the wild prairie, was less than 50,000.

The buffalo roamed the country then in huge herds, migrating across the plains to new pastures where the grass in one area failed. The buffalo and wild fowl fed the fur traders. The grass that fed the buffalo was waxy and tough, long in districts of comparatively plentiful rainfall, short to the cattle's heads, while it was little to wither in extra dry summers.

In 1856 the country supported one person to every 36 square miles, including Indians. The 1891 census, the last from which complete figures are available, showed a population of 2,854,000, more than one person per square mile. Last year the population cultivated 39,497,160 acres of prairie land compared with the 1,000 or less in 1856. The crops, lacking an outside market in 1936, were valued at \$244,642,000 last year. The greatest value was \$702,538,000 in 1927, a year when the average wheat price was 98 cents a bushel.

That year, by no means the best for dwellers in Palliser's Triangle, the typical farmer of the drought area's worst section raised 17.3 bushels of wheat per acre and earned a return of his farm of \$18.75 per acre. His best average wheat crop was in 1928 when he grew 25.3 bushels, earning \$19.87 per acre. His best earning year was 1917, when he grew 12.5 bushels per acre, and made \$24.37 on a wartime price of \$1.90 a bushel.

In 1936, the last year for which such figures are available, the farmer in the severe drought area raised an average of two bushels of wheat per acre, sold it for 38 cents and counted his earnings for a season's work at \$1.18 an acre.

That was the sixth successive year

of drought and drifting which the Dominion and Federal Department of agriculture are seeking to combat by scientific farming, planting trees to check the speed of the soil-drifting ground winds and preserving measures to keep best-threshold crops fresh during the growing season.

### Record Milk Production

Saskatchewan Guernsey Cattle Herd

Cows of the Guernsey association had all others in Saskatchewan during June for the highest average milk production, according to records of the department of agriculture, dairy branch. They produced 1,085 pounds per cow.

In June 222 herds, or 2,394 cows were under test in 54 centres. There were 437 cows on the valley honor list compared to 328 the previous month. The Carrot River Valley association led all others with 58 cows on the honor roll.

J. H. Reed, Nutana, had the high individual herd for butterfat production. His 10 cows showed an average of 55.6 pounds per cow. Martin Braaten, Birch Hills, had the high individual herd for milk. His eight cows showed an average of 1,433 pounds per cow.

### Predicts More Grasshoppers

Saskatchewan's Infested Area Likely To Be Larger Next Year

Saskatchewan may look forward to more grasshopper next year, according to a report issued at Ottawa by the department of agriculture.

The report states: Activities of sawy and grasshopper pests have resulted in fairly severe damage to wheat in fields where harvesting has been delayed as well as to feed grains and fodder crops throughout the infested areas.

From present indications, next year will see grasshoppers more abundant with the area of infestation extending further into the northwest section.

### Made It Worse

The minister and his wife were receiving a visit from a woman parlourer, when the minister's small daughter walked up to the visitor and gazing intently at her, said: "Oh, my, but aren't you plain!" Her mother was horrified.

"Whatever do you mean?" she said. "Apologies at once!"

"I only meant it for a joke," replied the child.

"Well," said the mother, "it would have been a much better joke if you had said: 'How pretty you are!'"

Fish, from either fresh or salt water, is said to be more digestible than any other form of flesh.

### Has Miniature Railroad

Boy Spends Six Years Building Model They Make

The wheels go round and round and all over the world by train and model trains spin over their tracks.

Every boy—even when he's grown up his mind—has been fascinated by these mechanical wonders. To some they are even a hobby. For instance—there's William Harvey of the United States.

Six years ago when he was 13 William began to think of the tiny trains as more than playthings. His father being a railroad man he grew up in—well, call it a locomotive atmosphere.

So with parental encouragement and family and neighborhood interest, his railroad grew. Billed craftsmen, in admiration of the boy's high standards in building his models to scale, helped him when his problems were tough.

Today he has a collection that wouldn't be duplicated for \$8,000. His equipment includes 865 feet of track, automatic train control, 175 cars, six engines, a passenger terminal to accommodate thirty cars, an eight-stall roundhouse, a coal tippie, an ice house and stock pens.

### Not Always Pleasure Resort

King Edward Starved His Holiday From Old Finland Refuge

Siberia, where the King started his Dalmatian holiday, would not always have been chosen as a pleasure resort by a visiting monarch, thinks a columnist in the News of the World. The rocky channel through which the royal yacht approached the picturesque harbor was for long the refuge of pirates. In its long history the town has seen much fighting against the Turks, as the old fortress on the heights behind the town still testifies. Today it is a town of its white marble, wagon-roofed cathedral, and its picturesque old houses of the Renaissance period. Its narrow, winding streets and squares, its squares, and the fine falls on the River Kirka, an hour away, are also great attractions.

### Selected By Bump

Cautious proprietors of a boarding-house near Sydney, Australia, wishing to engage two chefs, called in a phrenologist to read their "bump of cooking" and report on their character. The scientist selected two men out of the fifty applicants and, as the proprietress was pleased with them, phrenology has gained two more enthusiastic supporters.

### Flying Possibilities

Predictions that it would be possible for an airplane to fly from Croydon to Cape Town in one day at a speed of 500 miles an hour and to go around the world in two days were made by Selig Brodetsky, professor of applied mathematics at Leeds University, England, in an address at Rand University in Johannesburg.

## Subject Of Measurements Has Occupied Attention Of Scientists For Centuries

Scientists are trying to give you as accurate a deal as possible when you buy a yard of material from a shop.

For, unless the assistant's measure is composed of a metal known as invar, an alloy of steel and nickel (42 per cent.), one cannot be certain that it will not be affected by the temperature. In England, for example, for the benefit of the public, brass bars have been let into the north wall of Trafalgar-square, the floor of the Guildhall, London; Stephenson-place, Birmingham, and elsewhere. In Ottawa, the standards are at the National Observatory. These conform within thousandths of an inch to the measurements required, and should satisfy the average person.

But scientists, as a body, are extremely finicky. They begin by informing us that there is nothing absolute, after which they try to obtain an absolute measurement. At present they are trying very hard to determine the exact length of a yard by means of wave-lengths of light of a particular color which they maintain, very only an infinitesimal fraction, as they say, they have determined the yard to within one hundred-millionths of an inch or so. But, of course, they are by no means satisfied.

This business of inches, feet and yards goes back a long way. It is far more important than the average man realizes. Few give it more than a passing thought. But in official circles measurements are very important matters.

Take the metric system, for instance. A staff of 280 French engineers and mathematicians worked continuously for seven years before they determined the exact dimensions of the metre, which is the length upon which the system is based. It corresponds to 6,606,000 of the earth's quadrant.

English measures have given the authorities a great deal to think about—but not as much as that. The old Englishman of the Middle Ages was not particular. He measured by spans, phalanges of the thumb, and length of the hand and forearm.

The earliest table of English linear measures existing is one of about A.D. 1200. It served admirably in that period though one doubts whether it would be acceptable to the experts at a physical laboratory. The unit of length is a barley corn, and according to them "the length of a barley corn 117 times makes an yoke; and 117 yokes make a fote; and 117 fotes make a yard."

Even these people had a vague idea that exact measurements were necessary, and King Edward I. of Scotland (about A.D. 1150) laid down the standard for the Scots inch. It was to be the "thumb's of 117 men, and it is to be an mekill man and a man of measurabl stature and of a lytell man. The thumb's are to be measur'd at the rut of the nayll." It can be seen that he was a stickler for accuracy.

It was an age when accuracy did not matter a great deal. It was not an age of mass production. Bulls were not turned out by the hundred thousand, articles made of metal were not cast by the million and a mistake of a quarter of an inch did not mean a loss of thousands of pounds. Things were made to measure—even furniture—and payment was made accordingly.

Today, accuracy is absolutely essential. Without it, the world would be in a state of chaos. Nowadays, in the manufacture of motor-cars, wireless sets and other mechanical contrivances, rigid standards are imperative. A sixty-fourth of an inch must not vary by more than a hair's breadth.

Our "rough and ready" measurements have to be standardized; the more accurate ones can be checked by various methods. There is an instrument invented by Professor H. G. Vassett, of the University of California, which is so accurate that it records the exact pressure of a man's breath! His instrument is of little use to the average worker, for after a single measurement it has to be "reset" so that the metal can overcome the fatigue of its operation. Accurate standards have existed since almost the dawn of civilization though, as it happened, The Egyptians, the Indians, the Assyrians and other old races had based their standards on astronomical calculations, as modern nations do today. According to Bally, the creditable author of "Historie Astronomique," the measurement of the earth was taken repeatedly by primitive astronomers, and with extraordinary accuracy. He says: "We pass contemptuously by the results of ancient astronomical observations; we substitute others, and as we perfect them we find the same results that we had despised."

Generally speaking modern scientists find it impossible to improve upon the measurements of the meridian that were made on the plains of Chaldean, along the Nile or on the Ganges plain thirty centuries ago.

The meridian mile, which is one-sixtieth of a degree, a unit used by sailors all the world over, is exactly 1,000 Egyptian fathoms, and the Great Pyramid was constructed according to these principles. The "pyramid inch" is almost identical with the present British inch.

It is a curious thing that having decided upon a standard and attained it, no ancient nations attempted to divide it into ten equal portions, as the French have done, although to work with tens and multiples of ten is easiest.

There seems to have been a universal disinclination to seize the easiest way out of all these troubles and in every country where suggestions have been made to alter the calendar in a similar manner, stubborn opposition has been the result.

### Forecast Of Star Gazers

Predict Good Times And No Drouth For 1937

The star gazers forecast good times and no drouth in 1937.

At least that was what one of the leaders of the all-American astrological convention, D. M. Davidson, of Chicago, said was the consensus of opinion of the 500 astrologers. Although he said the purpose of the convention was to discourage indiscriminate predicting and put astrology on scientific standards, Davidson consented to announce the astrologers' read in the heavens that:

"The general economic outlook for America during the next year is good. The average citizen is going to fare well."

There will be a boom in real estate. There will be no recurrence of this year's disastrous drought, which star-gazers believe was caused by an excess of ultra-violet radiation from the sun.

There will be no general European war for at least a year. Japan will not advance on China until 1940.

### Saskatchewan Farm Expenditures

Low Average Cost For Maintaining A Family

Expenditures of Saskatchewan farmers during 1934 averaged \$1,262, according to an estimate of the living and operating costs on 638 farms in Saskatchewan as reported by 439 crop correspondents to the Dominion Bureau of Statistics. These figures refer to actual purchases including credits, but exclude food and fuel produced on the farm. The averages are low in view of the economic conditions which prevailed, the average living expenditures being \$532 for a family of 5.74 persons and operating outlays were \$780 for farms averaging 604 acres. Of the total cost \$23 per cent. was expended for living expenses, and 67.8 per cent. for operating expenses.

### Device Defuses Peaches

Norman Bartlett, Hamilton, Ont., inventor of a system for defussing peaches, predicted that housewives will soon refuse to accept fruit that hasn't had the "groofer-feathers" scraped off. With the aid of soft haired brushes, Bartlett claims he can turn out 250 baskets of peaches with a "school" of the comb-plum in an hour's time. 2169

## See What Fun This is Going to Be!

PATTERN 5669

"A lark, a lark—a lovely out-work basket—such fascinating fun to make you'll never believe until you see this delightful pattern and enhance your chair seat and armrest with its lovely floral design! French knot—single, outline and lacy daisy stitch are all skillfully combined to lend color to the delicate outline—while the lark forms the edge of the article. In pattern 5669 you will find two motifs 8 1/2 x 10 inches, one and one reverse motif 8 1/2 x 10 inches; material requirements; illustrations of all stitches needed; color suggestions. To obtain this pattern send 30 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspapers Union, 178 McDermott Ave. E., Winnipeg.

Linen and Room Arranged in Outwork Basket

SPEED TRAIN LEAVING WINNIPEG

Charging into space in the straight away leaving Winnipeg, the Canadian Pacific Railway's new light-weight speed train clips into its stride of 110 miles an hour. To satisfy his artistic demands, the photographer's request for a plume of smoke was granted, although the engineer on the new "3001" takes pride in the almost smokeless performance of the streamlined beauty. The train, with company officials aboard, was beginning its exhibition tour of the prairies. By the end of September it will take over its regular daylight run between Calgary and Edmonton.

### Miner Laboratories Busy

Heavy Receipts Of Gold Ore For Testing Are Reported

Reflecting the steady and widespread improvement in mining throughout Canada, the Mines Branch Laboratory of the Canadian Department of Mines reports that receipts of gold ore for testing during the first half of the year exceeded those of any like period in past years. In the majority of cases the ores are from the many gold properties throughout Canada that are entering or nearing production. Full advantage is being taken by operators of the modern equipment ore dressing and metallurgical laboratories of the Department of Mines, where the ores are being tested mainly to determine suitable mill treatment processes for the several enterprises.

Three research projects relating to the treatment of gold ores are underway. One is on refractory gold ores such as those that occur in the Bridge River area, British Columbia. The second is an investigation to determine the relationship of the mineralization and genesis of the ores to treatment problems; and the third is an examination of the modes of occurrences of gold in sulphides and the effect on ore treatment of such associations.

More test work is under way on base metal ores than in 1935, but the number of samples received is small in comparison with pre-depression years, when the high prices of the metals provided a stimulus for exploratory effort. A notable feature is the sharp increase in the number of requests for test work on non-metallic ores. The increase is traceable mainly to the distinct revival of activities in the building construction industries. Tests are being carried out of the beneficiation and uses of such minerals as china clay, silica sands and sandstones, quartzite, calcite, garnet, and mica, and on the tailings from asbestos milling plants.

### French Adjudicator

Judge Of French Theatre May Preside At Drama Festival

Col. H. C. Osborne, honorary director of the Dominion drama festival, returned from Europe and said next year's adjudicator of the drama festival will be a judge of the French theatre, if present plans materialize.

"A judge of the French theatre for the coming finals will give new ideas and a new point of view," Col. Osborne stated. "Naturally, at this early date it is impossible for me to make any definite announcement as to the individual. It is very hard for a man to say at the present time that he will be available to come to Canada late next winter, but the groundwork has been laid and I expect to make a definite announcement in the near future."

Col. Osborne also said he expected to be able to announce by the end of October who the regional adjudicators will be.

About half a million ounces of gold are consumed each year by dentists in the United States.

### SUNDAY SCHOOL LESSON

SEPTEMBER 20

CHRISTIAN LIVING

Golden text: Christ liveth in me. Galatians 2:20.  
Lesson: ROMANS 12.  
Devotional reading: Romans 8: 31-39.

#### Explanations And Comments

A Call to Consecration for Service, Romans 12:1, 2. The "One Volume Commentary" paraphrases these verses thus: God's redeeming love should be answered by the true sacrifice and the spiritual, ritual service of a life of purity and self-denial and work for God. Do not follow the fashion and customs of the worldly society around you, but let your ways of thinking be so changed by the Holy Spirit that you look for and recognize God's will and love to do it.

The meaning of these two verses have been aptly expressed by another in these brief words: "In view of all that God has done for us, we should henceforth live for him."

Be ye transformed by the renewing of your mind. "It is amazing what an immense amount of time and money some people will spend in order to change their appearance. But there is another way of transformation, and it is Heaven's way. The transformation begins in the mind. It begins its wonderful work of rejuvenating by completely altering the world of thought, and imagination, and ideal, and fancy, and dreams. It transforms your thoughts of God, and your thoughts of yourself, and your thoughts of others, and your thoughts about everything. Desires and aspirations and judgments—all changed into something which shares the life and likeness of God! And this is to transform life, and at every stage it is to make it beautiful."

Let your love be a real thing, with a longing for evil and a bent for what is good. Put affection into your love for the brotherhood; be forward to honor one another; never let your zeal flag; maintain the spiritual glow (Moffatt's translation). Dr. Robert E. Speer thinks that the word "fervent" does not do justice to the Greek word which Paul uses, which means literally "boiling." Paul's ideal was a man with a hot and burning heart; one with spiritual glow, as Moffatt has it.

Serve the Lord; let your hope be a joy to you; be steadfast in trouble; attend to prayer; contribute to needy saints; make a practice of hospitality. (Moffatt's translation).

### Brings Big Sum

Old Likeness Sold In London For Over £10,000

In the year 1464 or thereabouts a French painter named Jean Fouquet drew on a small piece of paper a swift likeness of a Papal legate who had a hawk nose, full cheeks, and searching eyes.

Just recently the likeness was bought in London for the astounding sum of £10,710 by Lord Duveen, bidding at Christie's during the third and concluding session of the Henry Oppenheimer sale of oldmaster drawings.

Most of the inventions in Britain in the last year were connected with aviation and motoring.

Wild ostriches can run 50 to 60 miles an hour for short distances.

### Forecasts Increase In Gold

Minister Of Mines Urges Help For Engineering Students

Expressing confidence that Canada would produce \$135,000,000 worth of gold this year, Hon. T. A. Crerar, Minister of Mines and Natural Resources, told the Board of Trade at Timmins, Ont., that no increase in the taxes on the mining industry would be levied "at least during the lifetime of the present government."

The Minister urged the big mining companies which were represented by their chief executives at the meeting to endow scholarships in Canadian Universities for students taking mining engineering courses. It would direct the attention of the people of Canada to the importance of the mining industry and encourage the young men to take up the study of mines. For one scholarship, he suggested that the winner be given a year in the ore laboratory of the Mines Department at Ottawa.

Last year Canadian mines produced \$116,000,000 worth of gold but this year the production looked as if it would reach \$135,000,000, and Mr. Crerar prophesied that in five years it would reach \$250,000,000.

### Even A Beginner Can Make These

Household  
Arts  
by  
Alice  
Brooks

Use String  
For an  
Effective  
Cloth or  
Bedspread

PATTERN 5193

Behold—this dream of lacy elegance—dainty squares of rich crochet simply combined to form a luxurious looking table cloth, bed-spread or dresser scarf! The easy "square" is learned in a jiffy, and—good news for budget—its ideal in humble string! You'll be surprised and delighted with the stunning effect this gracefully patterned lace will have in brightening any room. In pattern 5193 you will find instructions for making the square shown; an illustration of it, of the stitches needed; material requirements. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

### Valuable Metals Located

Miner At Goldfields May Produce Good Commercial Ore

Chiefly noted for gold discoveries Goldfields, Sask., mining field may produce other useful metals in commercial quantities, according to reports brought in by engineers.

Molybdenite, used for strengthening steel, has been reported. Wolframite, the ore containing tungsten, also used in tool-making and as filaments in light bulbs, has been discovered in several sections, as have nickel, lead, zinc, silver and copper. Pitchblende, carrying radium, has also made its appearance. The field is still too new to know just how large the deposits of the various metals are and whether they can be mined at a profit.

#### Glass Experts Fuzzed

Dr. John Clyde Hostetter, Corning, N.Y., glass expert, returned from a meeting of glass technologists in London with the startling news the experts are trying to decide what glass is. Dr. Hostetter directed casting of a 200-inch telescope for the California Institute of Technology.

Warehouses at Calgary, Edmonton, Regina and Winnipeg.

## NAZI LEADER WOULD REGAIN LOST COLONIES

Nuremberg, Germany. — Reichsfuehrer Adolf Hitler in a speech before 800,000 Nazis assembled Bolshevik, democracy and Jews.

Der Fuehrer's personal address followed a proclamation from him earlier in the opening day of the fourth annual Nazi party convention defining the Nazis' next immediate goal as repossessing of her colonies and rebuilding of her economic structure.

"Asserting 'the rock of foundation of the state is an authoritarian will,' Hitler said:

"Unlimited individual liberty leads to anarchy.

"All states have experienced the destructive effects of democracy.

"Bolshevism seeks to destroy culture as we see in Spain where 80 per cent. of the leading personalities are Jews."

In his 12,000-word proclamation, read to the 800,000 Nazis earlier in the day by Adolf Wagner, Bavarian Nazi leader, Hitler set forth his goal of regaining Germany's lost colonies.

In this fashion, Hitler said, would Germany's financial jam be broken and the increased markets would revivify her international trade, building up "our raw material forces."

Germany's pre-war colonies, either taken from her outright by the victorious Allies or removed from her control economically under league mandates, comprised 1,032,757 square miles and included territories in Africa, China and islands in the Pacific.

Hitler's attack on the Jewish influence in art and politics was preceded by the lovely harmonies of Beethoven's sixth symphony, before a huge audience in the open house. In the crowd were foreign diplomats, party dignitaries and military leaders.

Hitler condemned the Jewish mentality as fundamentally negative and destructive and tending inevitably toward decadence in art and toward Bolshevism in politics.

He characterized Soviet Russia as a country ruled by a parasitic coterie of Jews. Spain, he declared was another country whose culture was threatened with extermination by Bolshevism under Jewish leadership.

His theme was: Authority is the foundation of all harmony, whether in governments, commerce or art.

Der Fuehrer drew a picture of modern civilization tumbling down a rocky incline of decadent democracy into an abyss of anarchy.

"Authority sooner or later must prevail—either the kind we established here or the kind that will come after Europe's civilization has been wiped out by Bolshevism," he asserted.

The proclamation, sounded suddenly before 800,000 Nazis assembled in fourth annual convention, disclosed Hitler has signed decrees reorganizing the national economy and accelerating the planned production of all industrial, and agricultural products.

### Reward For Honesty

Scottish Court Sets It At Five Per Cent. Per Pound

Glasgow.—The reward of honesty was set by a Scottish court at five per cent.

Mrs. R. Lynn of Glasgow found two £20 notes (\$100 each) on Argyle street in Dunoon. The money was claimed by Miss Alexandra Cameron of Dunoon, who offered a reward of a shilling a pound.

The finder asked two shillings. The question was referred to police court, which allowed a shilling a pound (five per cent.).

### Leaves Large Estate

London.—G. K. Chesterton, English novelist, who died June 14, left an estate of £28,388 (approximately \$141,945), he will disclosed. The bulk of the property was bequeathed to his wife.

Pasai, South Africa.—Alarmed by America's "virtual exclusion" of South African wines from its markets, grape growers here have made sharp protest to the government.

### Churchill Busy Port

Grain Ship From France Makes Second Trip

Churchill, Man. — The motorship Jean L. D., owned by Louis Dreyfus and Company, docked here on her second visit of the season after making the voyage from France, in less than nine days, her average speed being more than 14 knots an hour.

The vessel sailed from here on her first voyage Aug. 22, carrying 323,000 bushels of wheat. At that time it was believed the vessel, one of the fastest and newest ships in the grain trade, could make three round trips between this port and Europe during the open season.

On her way here, the ship carried fuel oil for the Canadian government patrol boat, S.S. N. B. McLean, and the oil was transferred to the latter craft at Wakeham bay.

The Jean L. D. was loading some 320,000 bushels of number one northern wheat for Liverpool delivery.

S.S. Willowport sailed with 300,000 bushels of wheat for Queenstown. S.S. Brandon is loaded with wheat with 325,600 bushels of wheat for Queenstown. S.S. Troutport was expected to dock the following day, while S.S. Drakepool is partly loaded and is at anchor awaiting sailing instructions.

### Objects To Loyal Toast

South Africa Party Leader Leaves Banquet In Protest

Capetown.—A toast to King Edward VIII, as "King of South Africa" caused Lieut.-Col. C. F. Stallard, leader of the Dominion party in the house of assembly, to walk out of a government banquet at Johannesburg.

The loyal toast was given twice—first to the king of the United Kingdom and Ireland, then to the king of South Africa. Stallard left the hall as a protest against the second toast.

Stallard said afterward he considered the fact the king was singled out as king of the Union of South Africa for a separate toast was a "specific division of the sovereign" and deliberately emphasized a doctrine against which he has always protested.

Commenting on the affair the Argus said:

"The official explanation that the toast list was arranged in accordance with the usual practice of international etiquette does nothing to resolve the absurdity. It shows the external affairs office is not equal to the task of preserving the individuality of the king."

### Will Keep Colonies

France Refuses To Yield To Menace Of Germany

Paris.—Informed sources said that France, in the face of Chancellor Hitler's demand for Germany's lost colonies, would refuse to yield her share in Africa under the menace of the growing German army.

Officials previously had taken the attitude that France would keep Togo and the Cameroons (Kamerun), mandated jointly to France and Great Britain, at any price. But there was no immediate official comment on Hitler's proclamation.

Le Temps, well-informed Paris newspaper, said, however, of the German colonial question:

"No people will refuse to discuss a just and equitable organization of the European community on an equal footing with the German people. But no nation, even the weakest, will consent to bow before a peace imposed by German force."

### More Wheat Marketed

Ottawa.—Marketings of wheat in the prairie provinces during the week ended August 28 amounted to 15,618,583 bushels, an increase of 4,826,071 over the previous week. The Dominion bureau of statistics reported. In the corresponding week last year receipts totalled 4,802,509 bushels.

### Leaves For Churchill

Montreal.—The British steamer Avon River, first freighter to clear Montreal for Churchill this season, sailed from here to load grain at the Hudson Bay port. Only other ship to leave here this summer for Churchill was the government supply ship Nascopee. 2168

### ON COMMISSION

Joseph McCulley, of Pickering College, Newmarket, Ontario, who is one of the five members of the newly-appointed Youth Employment Committee, chosen by the Dominion Government to advise the National Employment Commission on the problem of unemployed youth.

### Full Arms Sovereignty

Has Been Restored To German Nation Declares Hitler

Nuremberg, Germany.—Chancellor Hitler proclaimed, he had restored "full arms sovereignty" to the German nation during the last year.

Hitler's assertion was contained in a three-minute speech made before hundreds of thousands of cheering Nazis gathered in Nuremberg for their annual party convention.

Said Hitler during the ceremonies at the city hall where he was presented with a four-century-old drawing of Nuremberg:

"This gift, with its plans for the city's ramparts and defences, reminds me of this most difficult period in my life when, in the past year, I restored full arms sovereignty to the nation." In defiance of the treaty of Versailles he has remilitarized the Rhineland and increased Germany's army since the last convention.

It was estimated 800,000 Nazis were in Nuremberg. The town was plastered with notices terming Bolshevism "world enemy No. 1."

### Study Imports Of Stock

Prince Edward Island May Take Cattle From West

Charlottetown.—Serious consideration was being given proposed importation of cattle to Prince Edward Island from the drought-suffering areas of western provinces, according to letters from Premier Campbell and Hon. W. H. Dennis, minister of agriculture, read before a meeting of Charlottetown board of trade.

The board discussed arrangements for the annual meeting of the Maritime board of trade here, Sept. 23 and 24. Hon. C. A. Dunning, Canada's minister of finance, is to address the annual dinner.

### HUNGARY HONOURS AMERICAN GENERAL

The unveiling of the memorial erected to General Harry Hill Bandholtz, member of the International Military Commission in 1919, by the Hungarian Government. The General earned the gratitude of the Hungarian people, when, armed with only a riding whip, he frustrated an attempt of Roumanian soldiers to despoil the Hungarian National Museum of some of its outstanding treasures.

### Official Delegates To League

Three Who Are Responsible For Government Going To Geneva

Ottawa.—Prime Minister Mackenzie King, Hon. Raul Dandurand, government leader in the senate, and Labor Minister Norman Rogers will be Canada's official delegates to the forthcoming session of the League of Nations. Dr. O. D. Skelton, under-secretary for external affairs, and Dr. W. A. Riddell, permanent advisory officer at Geneva, will be alternate delegates.

In making this announcement the prime minister said that because of the importance of this league session, and the great responsibility attaching to anything that may be said there, he had decided against having any delegates other than those responsible for the government or its administration.

Col. G. P. Vanier, a member of the staff of the Canadian high commissioner in London, will accompany the party to Geneva as expert adviser.

Senator Dandurand will bring to the delegation a wealth of experience in league affairs, having attended many sessions, served a term as president, and always maintaining a strong personal interest whether serving in an official capacity or private observer.

Labor Minister Rogers, one of the youngest men in the government, has been a student of League of Nations developments and was selected particularly, the prime minister said, because of the government's desire to have the sentiment of the younger generation represented.

The prime minister himself, Dr. Skelton, Dr. Riddell and Col. Vanier have attended many sessions of the league.

### Harbors Board Appointed

Members Will Have Jurisdiction Over Principal Canadian Ports

Ottawa.—Completing a move initiated soon after taking office last October, the government appointed a permanent national harbors board which will have jurisdiction over principal Canadian ports in place of the individual harbor commissions formerly existing.

Prime Minister Mackenzie King announced that Ralph Campney, one-time member of his own secretarial staff and now a lawyer in Vancouver, has been named chairman of the board. Col. A. E. Dubuc, chief engineer of the department of railways and canals, and B. J. Roberts, assistant deputy minister of finance, were named members of the three-man board.

### Plan Visit To Ethiopia

Rome.—The prospect that Premier Mussolini and the king-emperor, Victor Emmanuel, will soon visit their new African possessions arose when it was announced the Djibouti-Addis Ababa railway in Ethiopia has ordered special cars built for them and for Viceroy Rodolfo Graziani. The orders were placed with Italian companies.

## PEGGED PRICE BRINGS PROTEST FROM WHEAT POOL

Ottawa.—Regret the government is not disposed to reconsider its decision which pegged wheat prices at 87½ cents a bushel for No. 1 Northern was voiced here by W. A. Macleod, spokesman for the central executive of the Canadian wheat pools.

Comprising L. C. Broulette, chairman of the central selling board and president of the Saskatchewan wheat pool, P. F. Bredt, president of the Manitoba pool elevators, and George Bennett, Alberta pool board, the executive met with the wheat committee of the cabinet.

The delegation protested the 87½ cents pegged price was too low and also objected to the provision under which wheat must drop to 90 cents before the fixed price becomes effective.

Hon. W. D. Euler, minister of trade and commerce and chairman of the wheat committee, however, told the delegation its representations would be laid before cabinet. T. A. Cresser, minister of mines, and James G. Gardiner, minister of agriculture, are the other committee members.

Recalling the 87½ cents pegged price became operative with the restriction that deliveries to the wheat board would be accepted only if the open markets price closed below 90 cents a bushel, Mr. Macleod expressed disappointment, in a statement regarding the government's policy.

"We believe that this restriction on the operations of the board is contrary to the spirit and intent of the Canada Wheat Board Act and to all intent and purposes may be regarded as repealing the wheat board legislation by making it entirely ineffective, except in the contingency of wheat prices dropping to such a level," the statement said. "With producers denied the right to deliver their wheat to the board, it must inevitably go out of business. If such should be the deliberate intention of the government, the policy will be received with alarm and dismay not only by wheat producers but by western Canada generally."

"We believe that a higher minimum price than 87½ cents is justified by changed world conditions and the disastrously poor crops harvested in western Canada and the whole North American continent. It should be kept in mind that the average freight and handling costs of 15 to 17 cents per bushel must be deducted from the Fort William price, so that 87½ cents could give a net return of approximately 70 cents per bushel to the western farmer on the highest grade."

### Migration Plan Not Feasible

Industrial Workers Not Suited For Farm Work States Delegate

Plymouth, Eng.—Schemes for placing British industrial workers on Canadian farms are not feasible, Fred Molynaux, delegate from the Canadian Trades and Labor Congress, told the Trades Union Congress here.

"We have heard much about schemes to place emigrants on the land," said Molynaux. "If those who migrate are not farmers in the first instance, I doubt the feasibility of the project. Our experience is that an industrial worker is not easily transformed into a farmer and will eventually return to industry."

"There is no apparent reason why that should not be the case in the future as in the past, so we must doubt the chances of success for any such venture."

### Made Indian Chief

Lethbridge.—Baron Tweedsmuir, yielding in Waterton National park and Cardston, was named Chief Eagle Head of the Blood Indian tribe of the Blackfoot Confederacy in a ceremony at St. Paul's school on the Blood reserve.

### May Violate Treaty

Washington.—Claude Swanson, secretary of the United States navy, asserted that Japanese plans to retain 15,000 tons of overage submarines would involve "a violation" of the London naval treaty.

## Whose Air Is It?

Anyone who retires to the country to escape the hubbub of urban existence only to be disturbed by the roar of engines as planes follow the air line which passes over his roof has no redress. He must "take it" or get out.

That is the only implication possible from a recent ruling of the United States Circuit Court of Appeals, says The Christian Science Monitor. The owners of the property close to an airport claimed they owned 150 feet of air over it. The airplanes, leaving and arriving at the airport, flew thru that space, and the property owners sued for damages for trespass. Justice B. E. Haney declared: "The sky has no definite location, and, like the sea, is incapable of private ownership. The owner of land owns as much of the air above him as he uses, but only so long as he uses it. All that lies beyond belongs to the world."

The case presents an interesting phase of the mounting complexities inventions bring to modern existence. Legal minds will probably work out new legislation to meet new conditions. Certainly it seems that some equitable adjustment satisfactory to airmen and landmen will eventually have to be made.

## 5. GUNS AND AMMUNITION

THE gun for Skeet is the gun habitually used by the shooter in target shooting; in other words, the one that fits him. A good Skeet gun is substantially a good one for game birds as well.

Certainly, there is no necessity to spend hard-earned dollars on a new, special gun. If you are starting the game for the first time, and if you have never shot before, and therefore have to buy a gun, pay strict attention to fit, boring, weight, and caliber. Most important of all is to see that your gun fits. Here it is as well to get the advice of some old hand at the game, and also to gain practical experience for yourself by shooting borrowed guns for a while until the right one for you is obvious.

The sight of the gun-rack at a Skeet Club would be an eye-opener to the old, prejudiced trap-shooter. Double-barrelled, single-barrelled, under and over, pumpguns, automatics, all line up together, cheek by jowl. And all the way from 12 gauge

down past the 16s and the 20s to the 28s and the beautiful little .410 gauges, whatever the shooter owns or prefers. In rare instances only is the pump a good gun for the beginner at Skeet, unless he is a wizard at it.

Skeet shooters use anything from trap loads of 7½ shot to 10 shot with good results. The best ammunition is the regulation Skeet load of number 9 double chills, put up by the manufacturers for this purpose. The use of this load is becoming universal. There is nothing better to give the required density for clean breaks in all gauges and in open guns.

Remember, a good fitting coat or shooting jacket is essential, one that does not bag under the arms. Many Skeet shots are faster than real birds, and no one should handicap himself with a badly fitting garment. Guns have to come up quickly and a little surplus ridge of cloth or buckskin may just throw enough snag in the way to cause you to miss that spinning target.

This is No. 5 of a series of 12 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete write-up of this sportman's sport which is rapidly becoming the vogue across Canada.

FOR THE BEST SLOGANS FOR ROYAL HOUSEHOLD FLOUR

## This is What You Do

Merely write a slogan of not more than ten words relating to Royal Household Flour and good enough to describe this favorite brand. It's easy to do. Here are a few examples: "Best by Triple Test", "Made by the Master Millers" or "A Guarantee of Uniform Baking Results". You may send in as many slogans as you wish, providing you follow the simple rules below.

## YOU MAY WIN A VALUABLE PRIZE

We want a slogan for Ogilvie Royal Household Flour and for the best ones submitted during this contest will award prizes as outlined above. Read the simple contest rules and send in your entry. You may win a valuable cash prize.

There's a treat in store also for you if you've never tried this popular brand of flour—Royal Household. It is a flour of the first quality—good for bread, cake and pastry. It's triple-tested—tested for wheat quality before milling, tested for flour quality during milling and tested for baking quality after milling, all before you buy. Get a bag today.

## 216 PRIZES TO BE AWARDED!

### Here Are the Simple Rules:

- 1 Use a plain sheet of paper and write out your slogan. Write your name and address clearly at the bottom and on the other side of the sheet write the name and address of the store where you purchase your Royal Household Flour.
- 2 You may submit as many slogans as you desire, but with each one send the words "Royal Household" cut from the small leaflet in every bag of Royal Household Flour. Or you may send in a reasonably accurate facsimile of same.

**OGILVIE**  
TRIPLE-TESTED

**ROYAL HOUSEHOLD FLOUR**

3 This contest will close on November 30th, 1938. All entries must be postmarked not later than that date.

4 Mail your slogans to "The \$1450 Prize Contest, The Ogilvie Flour Mills Co. Limited, Winnipeg, Canada."

5 Contest is open to all residents of Canada except the employees of The Ogilvie Flour Mills Co. Limited and their families.

6 In case of a tie the prize money will be equally divided. The committee of judges is composed of three independent, disinterested persons in no way connected with The Ogilvie Flour Mills Company Limited and their decisions will be final. No correspondence will be entered into and all slogans submitted will become the property of The Ogilvie Flour Mills Co. Limited.

## RETAILERS

You share in this, too. The retailers named by the first six prize winners will each receive \$25.00 cash.

## Thou Shalt Not Love

— A NOVEL BY —  
GEORGIA CRAIG

### CHAPTER V.—Continued

I told myself then that if I saw you again that it would be a sign to me that at last I had found the girl I wanted. Heaven knows I've turned the town upside down, looking for somebody who could look the part, as well as act it. When I saw you again tonight, well, you know what I said—Three times and out! I guess you didn't understand." He leaned over and looked her straight in the eyes. "I don't know who you are, nor anything about you, except for the essential things I asked you. I don't want to know anything else. The past is gone. Your life begins this minute."

"You want to play—to be loved; loved. . . I'll make you the talk of the town—do a better press agent job than any movie actress ever heard of. It's a narrative. You'll start out with an advantage no siren in history ever had. Your reputation is already made for you! All you'll have to do is live up to it! It won't be with a Broadway background, either. It will be among the 'best people' in town, those with whom you'll mingle, on whom you'll cast your spell. Your every wish shall be

## RHEUMATISM

— often results from clogged and inflamed kidneys allowing acid toxins to get into your blood. Take GIN Pills to drive out these pain-causing impurities and soothe and strengthen your kidneys. 278

realized. You are beautiful — which of course you know. I'll provide the clothes and all the stage scenery. Every woman in town will be envious of you; every man will want to make love to you. Play up to it. Play!"

He paused to let his words sink in. To Starr it was still all part of that unreal dream she was sure was not yet finished. But he looked real enough. His voice was no argument of her imagination, his earnestness, sincere. He pressed his advantage, seeing her quiescence.

"All I ask is that you keep your name in the headlines— not of course with any remotest connection of a Starr Ellison that was. That girl's dead from this minute on—dead and buried. A new one, the famous, or infamous author, has arisen in her place." He could not, or would not, see the stricken look in Starr's eyes as he made his emphasis, nor could he know of the choke in her throat that kept her from crying out. "Dead and buried," he had said. . . He was interested only in his own scheming. "Starr Ellison, the author, must be kept on the front page, if possible, right from the go-off. I don't care how. It won't matter. What will be of account will be that every mention you get will increase the sales of the book. You'll make a fortune for me—and I will pay you accordingly."

He stopped and studied her a moment more, nodded his satisfaction.

"Yes, you look the type all right—knew it from the start—with those mysterious eyes of yours and all. . . We'll have to cook up some kind of story—you gave me an idea with those few words of Arab gab of yours—a small matter—leave all that to me. The important thing is that you grasp your role. If you haven't by any chance read the book I'll tell you that my 'Play-Girl' is a symbol of blatant sex appeal, beauty without emotion, without a soul. Do you understand? Do you think you can live the part?"

Could she? Dared she try? Oh, yes, she understood, and the understanding was rather staggering. The bold, devil-may-care, social-climbing Michael Fairbourne was ashamed of the book he had authored. He wanted to hide behind the skirts of a woman—so that his precious royalties could go on!

Starr was to help him make a fortune so that he could marry the proud Stephanie. She was to sacri-

fice her own personality—he didn't care the flick of a wrist about that; he had said so in no unambiguous terms. She was to quit being the Starr Ellison she had known for almost twenty-three years; and allow herself to evolve into a glamorous fiction character, a creation of the brilliant mind of Michael Fairbourne! Who was ashamed of it.

She flung up her head proudly, in that gesture her father had so often likened to the disdainful hauteur of his beloved ancient Egyptian princess. She wanted to tell him—so many things. Then she wilted. The realization of everything—came back to her; things she had forgotten; the six months of life—Tut-Amen-Ra—Ana-Sun. . .

Michael Fairbourne wanted her to do this thing. Well, why not? Six months of life, after all, were all she had left. She would have no future in which to harbor any lingering regrets. She had rallied against the fate which condemned her to be a drab, falling star. This man was giving her the chance to flash through those last six months, a flaming meteor. It could be Fate—an answer to her defiance of the Egyptian gods and their curses.

To do as he asked meant that she could drink deep of the gay wine of life. In her few months she could crowd in a lifetime of thrills. Defy grim destiny in a reckless round of pleasure. Surely she had the right to do that, she who was doomed?

A strange excitement possessed her suddenly. Her rummy features glowed. She said, impulsively:

"I can do it!" Michael's hand came across the table. A big warm hand clasping her cold small one to seal their bargain. She lifted her lashes to look at him out of her long, mysterious eyes. It didn't seem just exactly right. She must make some protest. After all, if they were to be so intimately associated, would it not be better if she confessed to him—a few things. She said softly:

"But after all, we're strangers. Why should we trust one another—

so far? You know nothing of me. . ."

He flung up his head, smiled enigmatically, but the hardness in his tone was not so noticeable.

"I thought we'd passed that. But what does it matter? Strangers—yes, perhaps. But do any of us ever truly know each other? Even after we've lived in close companionship all our lives? Aren't we lonely souls—all of us? Strangers?" The one brief glimpse he allowed her into his inner mind passed instantly. Once again he was the coldly calculating business man. He mentioned them, as though it were an afterthought:

"It's only fair to tell you that the job won't last forever. It may not last long at all. That's rather up to you—and to me, I suppose, as your manager-press agent. Fiddle-fancy is fiddle. You will be 'Play-Girl' only as long as people are interested in the book. It may possibly be but a few months. Then you will have to go back—wherever you came from."

A dagger of ice stabbed at Starr's heart. Her great black eyes assumed that wistful, haunting expression, that suggestion as of looking upon things remote and unearthly, which was part of her greatest beauty.

She murmured as though to herself:

"A few months will be enough."

### CHAPTER VI.

"We've got to have a background for you," Michael said, not in the least interested that Starr might have a perfectly good one, ready-made. And so he proceeded to furnish her with one which would have made an excellent plot for some other book he might some day write. Which suited Starr excellently. In this new role she didn't want to be reminded of the Starr Ellison of tragic days, nor would she have cared to be identified back in her New England home town with the Starr Ellison who was the notorious "Play-Girl."

She entered into all Michael's schemes enthusiastically, surprised at herself that she no longer shrunk from all his talk about Egypt and Egyptian things. Her communion with the priestess on a vase in the Museum had done that. In fact, she rather welcomed the idea of having Egypt recalled in every way, much as a wound can be temporarily eased

by the anaesthesia of further wounding.

It was Michael's idea to say she had come from Cairo. There was to be considerable mystery about just who she was, but he would see to it that there were rumors spread of her being the daughter of an American soldier of fortune and an Egyptian mother whose ancient and distinguished ancestry could be traced back to princesses of Cleopatra's day.

"You see," Michael explained, "it would all work out splendidly—with those eyes of yours and your mysterious air, to say nothing of those few words of Arabic you've picked up, though God knows where. Besides Cairo's so far away no one can investigate and find out anything at all. . ."

(To Be Continued)

### Showed Great Enterprise

Arizona Chicken Raiser Thought Kiwi Would Be Good Buy

Considerable enterprise was shown by a chicken raiser in Arizona, upon seeing an item which stated that the New Zealand kiwi, while no larger than the domestic hen, lays a fourteen-ounce egg. He wrote to the Auckland Chamber of Commerce asking for information as to the cost of "roosters and hens, and shipping costs pertaining to the kiwi fowl." He has been informed that the kiwi is absolutely protected and any person having one in his possession is liable to a fine of \$125. A kiwi is a unique bird with hair instead of feathers.

Along with his crown, King Edward VIII inherited a gold dinner service estimated to be worth \$10,000,000.

# ST ANDREW'S by the Sea

The above layout shows a good cross section of what is being done these fine summer days at the Algonquin Hotel, St. Andrews by the Sea, New Brunswick.

The Algonquin Hotel represents just about the acme of summer days enjoyment, and is a paradise for kid-

dies and grown ups, too. Sea bathing in the warm waters of Katy's Cove and sun bathing on the shining sands are two of the most healthful and entertaining occupations of those who visit this popular and smart Canadian resort.

## THE GOODYEAR STUDDED TIRE FOR CARS

Where the going is hard, this tire will pull you through while other tires slip and clog. It is built for the cars that travel over "see man's land"—for it has been tried and proven on gumbo roads and in deep snow.

This tire has maximum pull both ways—going ahead and backing up—plus greater resistance to side slipping.

## 2 NEW TIRES BY GOODYEAR

TO HELP YOU PULL THROUGH QUICKLY WITHOUT CHAINS

## THE GOODYEAR LUG TIRE FOR TRUCKS

It takes lots and going with a cleaver-like action. Then—as it revolves—it cleans itself of mud, snow, etc., automatically. It does not slip or gum up and it gives you maximum traction both forward and backward.

The tread is designed so that there is always a smooth surface on the road—no ruts.

If you have trucks that frequently need excess road grip, see the Goodyear Lug Tire now.

### Natural History Exam.

A teacher who is fond of putting the class thru natural history exams, is often surprised by their mental agility. He recently asked them to tell him "What animal is satisfied with the least nourishment?"

"The moth," replied one of them, "because it eats nothing but holes."

### Stony Plain and District.

Mr L. Kowensky, Grande Prairie, was a week-end visitor here.

Mr Val Pailer, teacher at Telfordville, was in town on Saturday.

Mrs Rief, who had been on a visit to friends here, has returned to her home in Vancouver.

Mrs Hugh McKinnon, Holborn, is on a visit with friends in Vancouver.

The boxing tournament billed for Sat. Sept. 19 at Kelly's Hall has been set over until Friday, Sept. 25, owing to the fact that some of the contestants were unable to be present on the date first set.

BUTTER AND EGGS WANTED at The Royal Cafe.

### Road Work Being Done.

The road in Div. 6, Spruce Grove M.D., from the Baseline up to the Baptist church, is being graded up this week. The road in the same division, from the Glory Hills Reform church east, along past the school for a mile, is being given the once over with the grader. The work is under the direction of Mr Charles Wudel.

### Duck Season Opens.

Tuesday at noon seen the opening of the season for shooting ducks, geese, rails, coots and snipe. The season opened officially here at that time, altho the season north of Clearwater and Athabasca rivers opened Sept. 1.

While accounts differ as to the best spots and the number of birds in the country this season, the local "first day" shooters report having secured their day's quota.

### Free Workers for Farmers.

According to a Federal government's announcement, farmers may be in the position next winter of being provided with labor at the cost of board and lodging alone, or possibly without even that expense.

In co-operation with the provinces, the Federal government proposes to pay half the cost "of such plans as can be worked out in conjunction with the provinces for the purpose of absorbing in primary product industries all physically fit, single homeless adults."

This program of farm work for single unemployed men will possibly place about 1700 Edmonton unemployed this winter, according to officials.

### The 1936 Wheat Crop.

The Dominion Bureau of Statistics, Ottawa, has estimated the wheat production of Canada for 1936 at 232,970,000 bu.

Of this amount 220,908,000 bu. are spring wheat, and 12,070,000 bu. fall wheat.

Spring wheat crop of the prairie provinces is estimated as 216,000 bushels.

### The Golf Competition.

The Ladies' Draw; 18 holes; par 90. First round:

Mrs F Lewis lost to Mrs Moyer  
Mrs Walton won from Mrs H Oppertshauser  
Mrs G Oppertshauser won from Mrs Michael  
Mrs Cumming won from Mrs Yates  
Mrs W E H Lewis vs. Mrs Robertson

Men's Draw; 18 holes; par 90; first round—

J Gannon beat J McCulla  
F Lewis won from G Bryan  
A Michael won by default from W Sampson

Mr Moyer won from Mr Outway

S Comisarow won from Mr Enders

G Oppertshauser won from F W Years

T J Hardwick won from Mr Kerr.

The Cup Competition is now on. The draws have been made—ladies vs ladies; men vs. men. Not many rounds in this competition have yet been played.

### Those Prosperity Certificates.

Those who were listening in, on the evening of Sunday, Sept. 6th, to the broadcast of the meeting of the Prophetic Bible Conference in an Edmonton theater, were informed by Premier Aberhart for whose benefit the prosperity certificates were intended. It appears queries had been made as to why social credit members of the legislature did not accept the Aberhart government's scrip in payment of their seasonal indemnity advances.

What foolish questions people will ask! The Premier is quoted as saying: "Certainly the MLAs did not take the prosperity certificates from the government, because the prosperity certificates were designed to increase purchasing power. They weren't meant for the people who already have money, but for those who have none."

"I have seen lots of MLAs with as much as \$95 or \$75 in the certificates in their pockets; they had taken it from merchants and given their own cash for it, in order to distribute the certificates and keep them moving."

"But there would be nothing gained by the government giving the certificates to MLAs in payment of indemnities, because the MLAs already are receiving cash."
